| II.17.02 Earth Systems and the Universe | Forces of the Universe | 9 - 12 | Explain the relationships between magnetic and electric forces. | 412 | average power in an electric motor | 146 | build a simple electroscope |
| | | | | 418 | electric charge is a fundamental property of matter | 147 | investigate the concept of electric charge |
| | | | | 419 | electric forces are created between electric charges | 149 | investigate charged balloons |
| | | | | 420 | explanation of coulomb | 152 | investigate magnetic forces |
| | | | | 421 | current is the flow of charge | 154 | draw magnetic field lines for a bar magnet |
| | | | | 422 | negative charge of electrons and current flow | 155 | test materials to see if they are affected by magnets |
| | | | | 423 | static electricity and charge polarization and induction | 161 | experiment with pushes and pulls of permanent magnet in a rotor |
| | | | | 424 | relationship of electric force and charge | 161 | investigate how an electric motor works |
| | | | | 425 | the force between charges | 165 | investigate electromagnetic induction |
| | | | | 426 | charge creates an electric field | | |
| | | | | 428 | source charges and test charges | | |
| | | | | 430 | a capacitor stores charge | | |
| | | | | 433 | ability of a capacitor to store charge is capacitance | | |
| | | | | 440 | magnetism explained | | |
